Prior Art

1. The following prior art made of record and not relied upon is considered pertinent to applicants' disclosure of an interimage effect imparting layer:

U.S. Patent No. 6,645,680 and U.S. Patent No. 6,346,372.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

While the prior art would anticipate the silver halide color photographic light-sensitive material containing a single interimage effect imparting layer, and it may be obvious to one of ordinary skill in the requisite art to try utilizing more than one of said interimage effect imparting layers as claimed by applications, said art does not, in fact, disclose or teach a silver halide color photographic light-sensitive material characterized by containing the two interimage effect imparting layers as presently claimed, each containing a different light-sensitive emulsion having a specific weight-averaged spectral sensitivity distribution.

Applicant have clearly demonstrated in the experimental results summarized in Table 11 of the instant specification that the inventive samples containing the two interimage effect imparting layers characterized by each containing a different light-sensitive emulsion having a specific weight-averaged spectral sensitivity distribution, exhibit marked unexpected improvements in color reproduction, as compared with samples containing either one of the interimage effect imparting layers or no interimage effect imparting layers.

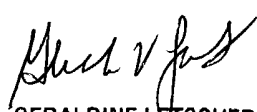

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-16 are allowed.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geraldine V Letscher whose telephone number is (571) 272-1334. The examiner can normally be reached 7:30am to 4:00pm.
